Jul 2023- Present

TechStack- Html | CSS | JavaScript | Git

- Developing and maintaining a landing page with knowledge of Html and CSS. Have Designed a Portfolio containing Skill section, Project section, Resume section etc.
- Designed a Calculator using Html, CSS, JavaScript with interactive interface with buttons of addition, subtraction, multiplication and division.

PROJECTS

ATM MANAGEMENT SYSTEM (Working)

- User Selects an option from the option displayed on the screen. The options are related to withdraw the money, check the balance, deposit the money and exit.
- To withdraw the amount, we simply get the withdrawal amount from the user and remove that amount from the total balance and print a successful message.
- To Deposit the money, we simply get the amount from the user, add it to the total balance and print the successful message.
- To Check the balance, we simply print the total balance of the user.

SODOKU SOLVER

- Sudoku generator and solver implemented in Java. Consist of two main component a Sudoku generator and solver. The Generator randomly generates valid sudoku boards of varying difficulties, while the solver uses backtracking and other techniques to find solution to given sudoku board.
